□ Salesforce Summer Program – Light Completion Sprint (2 Hours)

□ Goal for Today

Today's goal is:

- Increase Trailhead completion
- Get exposure to additional Salesforce concepts
- Build familiarity with the ecosystem
- Maintain consistent progress

□ Focus on completion + understanding the big picture.

□ Trailhead Modules (COMPLETE TODAY)

Follow this order:

---

1 □ Search Solution Basics (~35 mins)

Focus:

- How search works in Salesforce
- Search optimization
- Finding records efficiently

---

2 □ Agentforce 360 Platform Events Basics (~50 mins)

Focus:

- What are platform events
- Event-driven systems
- Notifications and asynchronous communication

□ Do NOT worry about deep technical details.

---

3 Command-Line Interface (~55 mins)

Focus:

- What is CLI
- Why developers use terminal tools
- Basic command-line workflow understanding

You do NOT need to memorize commands.

Videos (Verified Working Links)

1 Salesforce Platform Events Explained

https://www.youtube.com/watch?v=J6J0ZkP9aJQ

Focus:

- What are platform events
- Why event-driven systems matter

---

2 Salesforce CLI Introduction

https://www.youtube.com/watch?v=0nM4QZZynho

Focus:

- Why CLI is useful
- Developer workflow basics

---

3 Salesforce Search Basics

https://www.youtube.com/watch?v=qG2QvX9nR1Q

Focus:

- Search functionality
- User productivity
- Data retrieval

□ LIGHT TASKS (Quick Reflection Only)

Task 1 □ → Platform Event Thinking

Give ONE real-life example where:
□ one action should notify multiple systems/users automatically.

Examples:

- Student registration
- Payment completed
- Course cancelled

Task 2 □ → CLI Reflection

Answer:

□ Why do developers prefer command-line tools instead of only clicking buttons?

(2–3 lines enough)

Task 3 □ → Search Reflection

Answer:

□ Why is fast and accurate search important in enterprise systems?

(2–3 lines enough)

□ GitHub Submission

Create:

/light-completion-day/

README.md should contain:

- Modules completed
- One learning from each module
- One doubt/question
- Screenshot of Trailhead progress

 Keep it SHORT today.

□ □ Important Instructions

- Focus on completion today
- Do NOT overthink technical details
- Understand the high-level purpose of each topic
- Spend around 2 hours maximum

□ End of Today Outcome

You should now have basic awareness of:

- Event-driven architecture
- Salesforce CLI workflow
- Enterprise search systems
- Developer tooling ecosystem
